

HPGP™ 101-C

Ultra High Purity Gas Particle Counter and PDS-E

Provides reliable in-line contamination monitoring for process gases at line pressure

Without measurement there is no control

High-technology manufacturing processes often require high-purity gases. The HPGP 101-C provides reliable in-line contamination monitoring for process gases at line pressure.

The HPGP is compatible with most non-toxic gases and can be used in many reactive gas monitoring applications.

The PDS-E (Particle Data System - Ethernet) instrument collects and reports data captured by the HPGP 101-C probe.

BENEFITS

Reduced Cost

- Speed qualification of process gas distribution systems
- Detect particles in gases before they impact yield
