Syringe Liquid Sampler

with UltraChem[®] 40 Particle Counter

The SLS-1040 Syringe Sampling System enables safe, accurate and efficient testing of particle levels in liquid laboratory samples and process chemicals. Precision is achieved through accurate control of a syringe and simple flow-path for delivering liquid samples from a sample vessel or chemical container directly to the particle sensor. The SLS-1040 features an on-board UltraChem 40 particle sensor, which uses PMS patented NanoVision Technology® to measure particles as small as 40 nm in a wide variety of process chemicals. It is ideal for applications where efficient sampling of chemicals or lab samples is required, with the sampler contributing zero contamination to the chemical sample. The system consists of a selectable syringe for either corrosive or non-corrosive liquids, a selectable particle sensor for different sizing sensitivities, and batch sampling software.

NanoVision Technology [®]

BENEFITS

- Precisely measures particles as small as 40 nm
- Versatile system allows selection of various particle sensors and syringe sizes
- Eliminates sample waste with a small sample volume
- Cost-effective
- Easily configurable

FEATURES

- Proven PMS UltraChem particle sensor with NanoVision Technology
- Menu-driven data collection with SamplerSight software
- Multiple syringe sizes—1, 5, 10 and 25 ml
- Wetted materials compatible with corrosive chemicals
- Compact design with on-board particle sensor

APPLICATIONS

- Diverse applications in semiconductor and process chemical manufacturing
- Incoming quality measurement of process chemicals
- Point-of process monitoring on process tools
- Testing and qualification of chemical components
- Outgoing chemical qualification testing
- Mechanical parts cleanliness testing

Syringe Liquid Sampler

with UltraChem[®] 40 Particle Counter

SLS-1040

Syringe Size	1, 5, 10 (standard), 25 ml	
Sampling Mode	Vacuum, Batch	
Wetted Surface Materials	Glass, Teflon® (all fluoropolymer materials optional)	
Power	100 – 240 V, 50 – 60Hz	
Sample Volume	Adjustable using software interface15 x 9 x 17.1 in (38.1 x 22.0 x 43.4 cm) including particle counter	
Dimensions (H x W x L)		
Weight (Particle Counter)	42 lb (19.1 kg) including particle counter	
Environment	Temperature: 50 – 86 °F (10 – 30 °C); Humidity: Non-condensing Indoor use only Pollution degree 2 Over-voltages (transients) Category II Ordinary protection (not protected against harmful ingress of moisture) Class I equipment (Electrical earth ground from the mains power source to the product input is required for safety)	

UltraChem 40

SLS Instrument Label	SLS-1040	*Greater than 90% acc (less than 10% coincid loss) at max. recomme concentration.
Size range	40 – 125 nm	
Channels	40, 70, 100, 125 nm	
Flow rate	5 ml/min	 ** Compatible with hyde acid sampling. UltraChem® and LiQuilaz® are trademarks of Particle Measuri Teflon® is a registered trademar Chemours Company. Kel-F® is a registered trademar All other trademarks are the pi their respective owners. Particle Measuring Systems, In the right to change specification notice.
Sampled %	40% Monitor mode; 20% Spectrometer mode and High-Scatter mode	
Maximum concentration*	2,500 particles/ml, Monitor mode and Spectrometer mode 15,000 particles/ml, High-Scatter mode	
Zero count	< 20 counts/l	
Maximum pressure	Ambient pressure	
Laser source	Laser diode Class I, complies with US 21 CFR 1040.10 and EN 60825-1 Internally an enclosed Class 4 laser is used per EN 60825-1	
Sample temperature	50 – 122 °F (10 – 50 °C)	
Wetted surface materials	Sapphire**, Teflon®, Kel-F®	
Calibration	Materials used are traceable to US National Institute of Standards and Technology (NIST) and Japanese Institute of Standards (JIS).	
Software	SamplerSight	© 2018 Particle Measuring Syst All rights reserved. 2018.10
