

HPGP-101-C

High Pressure Gas Probe with PDS-E

High-technology manufacturing processes often require high-purity gases. The High Pressure Gas Probe system, HPGP-101-C, provides reliable in-line contamination monitoring for process gases at line pressure.

The HPGP is compatible with most non-toxic gases and can be used in many reactive gas monitoring applications.

The PDS-E (Particle Data System - Ethernet) instrument collects and reports data captured by the HPGP-101-C probe.

BENEFITS

Reduced Cost

- Speed qualification of process gas distribution systems
- Detect particles in gases before they impact yield
