

ENVIRONMENTAL POLICY

Particle Measuring System (PMS) recognizes that the responsible management of the environment for our employees, neighbors, customers and the public is one of our key principles and is a significant element in our business strategy.

Particle Measuring System will achieve responsible environmental compliance through the following:

- Minimizing the probability for adverse impacts on the environment by operating our facilities safely thru responsible energy conservation programs
- Minimize the use of unsustainable materials and the production of superfluous waste
- Integrating environmental policies and programs in the core of our business and evaluating management on their performance in implementing these policies and programs
- Striving to improve environmental performance as technical developments, scientific understanding, customer, and regulatory requirements advance
- Educate and train employees to ensure they conduct their environmental activities in a responsible manner
- Communicating to our employees, neighbors, customer, and the public on activities involving the environment
- Promoting the environmental action program and encourage management to adopt systems with a view to the effective monitoring of environmental performance and standards to achieve goals and objectives

Particle Measuring Systems assumes accountability for applying these principles of this policy through the commitments and actions of each employee.

Regards

John Mitchell
